Lesson 3: Variables

Variables hold data. They can be any sequence of letters, numbers and underscores with the following restrictions.

- Cannot start with a number
- Cannot be a reserved word (talk about those later)

However, make them meaningful except

- counter variables (think counting – 1 to 10)

Homework for Lesson 3

Do the following using Python 3

What do you think would be good variable names for the following?

- Name of student
- Age of student
- 1st line of Address of Student
- 2nd line of Address of Student
- grade on 1st test
- grade on 1st quiz
- grade on 2nd test
- grade on 2nd quiz
- final exam grade
- overall grade
- Name of school bully number 1 (the alpha male)
- Name of school bully number 2
- Name of your favorite teacher
- Name of your most hated teacher
- Your date of birth
- Your brother's date of birth
